EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with R. Burns Israelsen (42,685) on October 30, 2008.

The application has been amended as follows:

Claim 14. A method of managing distributed data storage comprising the acts of:

providing a plurality of distributed storage nodes, each node existing at a physical location and each node having one or more associated contexts that relate to storage characteristics of each node, the contexts including first contexts including a political context, an economic context, and a geographic context that are associated to at least the physical location and second contexts including a network topological context that are associated with attributes of the storage node;

receiving a data storage task in one of the storage nodes;

determining desired criteria associated with the received data storage task, wherein the desired criteria define storage characteristics for the data storage task;

selecting one or more of the plurality of storage nodes by matching the desired criteria to the associated first and second contexts, wherein the selected one or more of the plurality of storage nodes have first and second contexts that satisfy the desired criteria; and

executing the storage task in the one or more selected storage nodes.

Claim 27. A data storage service comprising:

receiving data storage access requests from a file system, the storage access requests including performance criteria that defines storage requirements for data associated with the storage access requests;

maintaining a state information data structure including state information describing the contexts of a number of network-accessible storage devices, wherein first contexts include a political context, an economic context, and a geographic context that are related to a physical location of the network-accessible storage devices and second contexts ~~including~~ include a network topological context that is related to attributes of the network-accessible storage devices and wherein the first and second contexts are used to discriminate between storage characteristics of the number of network-accessible storage devices; and

using the first and second contexts from the state information to allocate capacity within the network-accessible storage devices to handle the received data storage request by using capacity network-accessible storage devices having contexts that satisfy the performance criteria.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: applicant has made significant amendments to the recited claims to clearly define the claimed invention so that the claimed invention distinguishes from the teachings of the prior art. More specifically, the prior art fails to teach or suggest that both first contexts including a political context, an economic context, and a geographic context related to the physical location of a storage node and second contexts including a network topological context related to attributes of a storage node are used to identify and select storage nodes to serve a data storage access request, as similarly recited in independent claims 1, 14, and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HASSAN PHILLIPS whose telephone number is (571)272-3940. The examiner can normally be reached on Mon-Fri (8am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee can be reached on 571-272-3964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
